PROFESSIONAL SUMMARY

Software Engineering graduate with full-stack project experience across Python/FastAPI, React, Node.js, Java, and Spring Boot, backed by PostgreSQL and AWS. Recent work focuses on multi-tenant backend design, data integrity, and automated testing. Interested in backend and full-stack new graduate software engineering roles.

EDUCATION

WESTERN GOVERNORS UNIVERSITY - WGU — Millcreek, Utah
B.S. Software Engineering, GPA: 3.8 — 2024-2026

LAKE WASHINGTON INSTITUTE OF TECHNOLOGY — Kirkland, WA
Associates of Applied Science – Transfer, Minor in Computing and Software Development — 2021-2023

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL
Backend: FastAPI, SQLAlchemy, Node.js, Express, Spring Boot, REST APIs, JWT
Frontend: React, Next.js, Angular, Tailwind CSS, HTML, CSS
Databases: PostgreSQL, MySQL, MongoDB, Firebase
Tools/Cloud: Git, Docker, AWS, GitHub Actions, Pytest, Playwright, Jest, Postman

PROJECTS

ClinicRecall — Multi-Tenant Patient Recall System | *Python, FastAPI, PostgreSQL, Next.js, TypeScript* | *Live Demo* | *Code*

- Built a multi-tenant SaaS that imports patient CSVs, computes who is overdue for an annual visit, sends reminder emails, and tracks each patient through scheduling and visit completion.
- Enforced tenant isolation at the repository layer, resolving organization_id server-side from a verified ES256 JWT rather than accepting it from the client, with Postgres row-level security as a secondary control.
- Made reminder sends idempotent under duplicate scheduler runs using a unique constraint on (patient, rule, due date) with insert-before-send inside a SAVEPOINT.
- Backed the build with 576 backend tests, a 13-step Playwright walkthrough, and an automated accessibility pass, gated behind a single CI verification target.

Swap Spot — Full-Stack E-Commerce Platform | *React, Node.js, MongoDB, Redux*

- Built a MERN e-commerce platform with user authentication, protected admin routes, product management, cart functionality, and order checkout.
- Implemented JWT authentication with bcrypt password hashing and role-based access control for customer and admin workflows.
- Integrated PayPal payments and Cloudinary image uploads, then deployed the production build on Render.

GreenBite — Recipe Platform | *React, Tailwind, REST APIs, jsPDF*

- Built a recipe discovery platform with ingredient-based search, saved cookbook persistence, and exportable grocery lists generated from selected recipes.
- Integrated the Spoonacular API with filtering by ingredient, category, and dietary preference, handling partial and empty result states.
- Reduced unnecessary re-renders and redundant API calls, and built reusable components for recipe cards, filters, and detail views.

EXPERIENCE

Store Manager — May 2022 – Aug 2023
Dick's Sporting Goods — *Bellevue, WA*

- Led daily store operations, supervised associates, resolved customer escalations, and supported sales, inventory, and merchandising execution.
- Trained team members on procedures, task prioritization, and customer service standards in a fast-paced retail environment.

Delivery Station Learning Ambassador — May 2019 – Apr 2021
Amazon — *Renton, WA*

- Processed, scanned, sorted, and staged high-volume packages while meeting productivity, accuracy, and safety expectations.

CERTIFICATIONS

AWS Cloud Practitioner — *Amazon Web Services* — 2026-01
ITIL Foundation Certification in IT Service Management — *ITIL* — 2025-12
CompTIA Project + — *CompTIA* — 2025-09
Google IT Support — *Coursera / Google* — 2023-09
